

ARUBA

The Aruba is a contemporary table with a discreet precision engineered mechanism which allows the table to extend with ease.

The mechanism within the table is manufactured through precision engineering where tolerances are within 10 microns to ensure a smooth and quality movement.

The leg frame is UV bonded to the glass top. The UV bond has been laboratory tested and meets a very high standard of 450kg shear pressure per leg. Glass table top corners are rounded for safety.

The glass tabletop and leg frames are available in a range of Swanky Design colours and effects.

Materials used are environmentally friendly. The table has been designed so it is simple to assemble. Each table is stamped with the Swanky Design Logo. Made In England.

All glass is Toughened Safety Glass and conforms to British Standards BS 6206 which is recognised worldwide. Table dimensions are for the glass table top only and do not include the leg frame.
